SKILLS SUMMARY

Languages: JavaScript/TypeScript, C#, SQL, Java, PHP, Python
Frameworks: Next.js, .NET Core MVC, .NET Web API, Spring Boot, React Native, Pandas
Tools: MySQL, PostgreSQL, SQL Server, Neon Serverless DB, Drizzle ORM, Convex, Excel
Platforms: Vercel, Clerk Auth Provider, Stripe, Gemini API, Jupyter Notebook, Google Colab
Soft Skills: Problem-solving, Communication, Adaptability, Time management, Creativity

WORK EXPERIENCE

Freelance Web & Software Developer	2021 – Present
- Architected and deployed over 15 responsive web applications for diverse clients (students, small businesses) from concept to launch, utilizing Next.js, React Native, .Net, and React.js. - Managed full-stack development, including database design and implementation with MySQL, PostgreSQL, and Neon Serverless DB, leveraging Drizzle ORM for efficient data management. - Developed and integrated RESTful APIs using .NET Web API and Spring Boot to extend application functionality and connect with services like Stripe and Clerk Auth Provider. - Engineered data solutions and performed analysis with Python and Pandas within Jupyter Notebook/Google Colab environments, transforming raw data into actionable insights for clients, as well as for training machine learning models like Linear Regression, Naive-Bayes, and Decision-Tree. - Optimized application performance and scalability through strategic deployment on platforms like Vercel, ensuring robust and secure user experiences. - Collaborated directly with clients, translating complex requirements into technical specifications and providing ongoing maintenance and support for delivered solutions.	

EDUCATION

Laguna State Polytechnic University	San Pablo City, Laguna, Philippine
<i>Bachelor of Science in Information Technology Major in Web and Mobile Development</i>	June 2021 – Present
Canossa College	San Pablo City, Laguna, Philippine
<i>Accountancy, Business and Management</i>	June 2019 – March 2021

PROJECTS

TechTrail: AI-Powered Learning Management System (LMS) LINK	March, 10 2025 – April, 2 2025
- Developed a comprehensive LMS using Next.js, Neon DB, and Drizzle ORM, featuring AI-driven course and reviewer generation through Gemini API integration. - Implemented robust backend APIs with .NET Web API to manage course content, user authentication, and data retrieval, ensuring a scalable and secure platform. - Integrated YouTube API to facilitate dynamic video content generation and embedding, creating a rich and interactive learning experience for users.	

Zeno: AI-Powered Online Code Editor | [LINK](#)

April, 14 2025 – April, 28 2025

- Engineered and launched a real-time online code editor, integrating the Gemini API for AI-powered code assistance and suggestions, enhancing developer productivity.
- Designed and implemented a robust backend using Next.js with Convex real-time database for seamless collaboration and instant code synchronization across users.
- Integrated Stripe for secure payment processing, enabling subscription models and premium features, demonstrating proficiency in e-commerce integration.

CogniCare: AI Virtual Checkup Assistant | [LINK](#)

May, 12 2025 – May, 20 2025

- Developed an innovative AI-powered virtual checkup assistant using Next.js, NeonDB, and Drizzle ORM, aiming to revolutionize healthcare accessibility and efficiency.
- Integrated VAPI for natural language voice interaction, enabling users to conduct preliminary health assessments and receive personalized recommendations.
- Successfully implemented robust user authentication and billing functionalities directly leveraging Clerk Auth Provider, demonstrating proficiency in secure user management and subscription handling.

CERTIFICATES

12th IT Skills Olympics | [CERTIFICATE](#)

Makati, Philippines

University of Makati Participant

November 24, 2023

- Competed in IT skills challenges, showcasing innovation and problem-solving abilities.
- Collaborated with team members to tackle complex IT tasks.
- Received recognition for outstanding performance in multiple categories.

GreatStack Certificate of Completion | [CERTIFICATE](#)

Remote

React Project: Gemini Clone App

June 20, 2024

- Successfully completed and implemented a project using React.
- Developed a clone app with features replicating the original Gemini platform.
- Improved user interface and experience through iterative testing and feedback.

Cisco Networking Academy | [CERTIFICATE](#)

Online

Certificate of Completion: Networking Devices and Initial Configuration

September 16, 2024

- Completed coursework on networking devices and initial configuration.
- Gained hands-on experience with configuring routers and switches.
- Demonstrated proficiency in network troubleshooting and maintenance.

Google Developer Skill Badge: Building for tomorrow with the Gemini API | [CERTIFICATE](#)

Remote

Google Developer

August - April 2024

- Completed comprehensive hands-on labs and challenges focused on leveraging the Gemini API for advanced AI applications, demonstrating proficiency in integrating generative AI models.
- Gained practical knowledge in prompt engineering, multi-modal AI capabilities, and efficient API utilization for various development scenarios, including text and image generation.
- Developed foundational skills in building intelligent applications and features, enhancing capabilities in AI-powered web development and innovative solution design.
